

# Trapeze Wall Mount

## Applicable Products:

BPSB1 (One Section)  
BPMB1 (Two Section)  
BPMB2 (Three Section)  
BPMB3 (Four Section)

1. Screw together top and bottom crossbar sections (fig. A).
2. Determine crossbar width. Align brackets on wall and mount using Philips head screws provided. If mounting to drywall or hollow walls, predrill 3/16" holes and insert molly anchors before mounting bracket to wall (fig. B).
3. Temporarily mount crossbar to end brackets to determine center bracket position (fig. C).
4. Slide center bracket(s) underneath crossbar until it rests on the hook (fig. D).
5. Mount center bracket(s) to wall using Philips head screws provided (fig. E).
6. Remove crossbar and slide top and bottom crossbars into pole pockets located on the graphic (fig. F).
7. Reinstall top crossbar to complete installation.

Steps shown are for the **BPMB1** unit. Your unit may contain more components but installation is the same.
