

All our Fabric are Polyester based and can be washed.

It is recommended that when washing your graphics, you do so in a cold or luke-warm cycle with a mild detergent. **CAUTION: Do not wash in Hot or Extreme Temperature.**

Lycra based graphics are recommended to tumble dry on very low heat or air only. (PolyFlex and PolyLycra) **CAUTION: Do not use iron on these fabrics.**

Banner stand or Roll Up Graphics are recommended to hang dry. Wrinkling may result and steaming of graphic is recommended. **CAUTION: Do not use iron on these fabrics.**

Graphic with Velcro

Be aware that Graphics with Velcro attached should be cold water washed and either air tumble dried or hung to dry as Velcro will either shrink or warp as a result of excessive temperature. Therefore creating a problem when re-attaching graphic to structure.

Onsite Cleaning

A Tide Stick or Oxy-Clean spray can be used for small scuffs or stains. Wet area gently and apply cleaner. Gently rub with clean cloth to remove marking and dampness. Repeat if necessary.

Testrite Visual Products is not responsible for damage as a result of cleaning, should this occur.
