

Evo Literature Holder - ELH-WM Series

1. Attach the crossbars to the uprights, using the longer screws provided, going through the upright and then into the crossbar. Do not over-tighten, stop when screw is flush with the upright. Be sure to install all the crossbars with the shelf holes facing the same direction. There are NO HOLES on the face of the bottom crossbar. Make sure the mounting holes on the crossbar face the wall side of the wall mount bracket (see Back View below). Connect the second upright assembly to the crossbars using the longer screws provided. Repeat for all of the crossbars.
2. Place the shelves over the crossbars and fasten the shelves to the crossbars using the shorter screws provided. It may be helpful to have someone else hold the shelf at the correct angle when putting in the first screw for each shelf.
3. Use the 4x mounting brackets on the assembly to attach the unit to the wall using the appropriate screws and anchors for your wall.
