

# FrameGraphix Magnetic Signware Stand™ - TLS1472, TLS2472

1. Identify the bottom section of the frame. The bottom section has two stand-offs attached on the top end.
2. Attach the bottom section of the frame to the base using the screws provided. The flat head screws are for the bottom of the base. The round head screws are for the sides of the base. **NOTE: The screws arrive attached to the frame for shipping. Remove the screws from the frame and then connect the bottom frame to the base.**
3. There are removable circle stickers labeled ① and ② near the joining points on the frame sections to indicate the correct orientation for connecting the top frame section. Match stickers 1 with 1 and 2 with 2 when sliding the frame top section onto the bottom section. Attach the top frame section to the bottom frame section using the screws provided. **NOTE: The screws arrive attached to the frame stand-offs for shipping. Remove the screws from the frame stand-offs, then connect the top frame to bottom frame.**
4. For -MM units: Attach magnetic graphic to steel surface.
5. For -MR units: Attach magnetic surface to metal surface, then attach metal graphic to magnetic surface.

TLS2472-MM shown
