

Hands-Free Door Opener - HDF

1. Determine the location of the Door Opener on the door. Using the Door Opener as a template, place it against the door and use a pencil to mark the hole locations.
2. Using a 5/16" drill bit, drill (1) hole through the door at the **center** marked location (**fig. A**).
3. To mount the Door Opener to the door, align the center hole in the Door Opener with the hole in the door. Using the flathead screw and barrel connector provided, mount the Door Opener to the door as shown.
4. Once mounted, align the left/right holes in the Door Opener with left/right marked locations on the door. Using the (2) wood screws provided, screw the Door Opener to the door to hold it securely in place (**fig. B**).
