

Universal Ceiling Track Grid Divider Set™ - UTD Series

1. Slide the hooks into the channel of the track.
2. Place caps onto ends of track.
3. Rotate the new track so that the end tabs rest on the lip of the existing ceiling dividers.
4. Ensure ceiling track is securely installed. If not, reposition until stable (not shown).
5. Attach graphic to hooks (not shown).

Note: End cap is ornamental only and DOES NOT provide structural support.
